#### Timeline

December 3rd: 1st Call for submissions  
January 18th: 2nd Call for submissions  
February, 22nd: Submissions due  
March, 10th: Notification  
April, 1st: Final abstracts due  
May, 10th: Revised/final versions due

Rest like in previous years

4 submissions:

- 3 videos
- 1 video explaining an app

All PC members reviewed all submissions

4 submissions:

- 3 videos ← One we suggested to split into 2 videos
- 1 video explaining an app

All PC members reviewed all submissions

4 submissions:

- 3 videos ← One we suggested to split into 2 videos
- 1 video explaining an app

All PC members reviewed all submissions

Submissions through easychair

Skype meeting on March 5 for discussion and vote

2 accepts, 2 conditional accepts

Short deadline extension for one group of authors ⇒ All final videos received on May 20

Only 4 submissions

⇒ Discussion on how to possibly increase the number of submissions for future editions:

Only 4 submissions

⇒ Discussion on how to possibly increase the number of submissions for future editions:

- Some of the submissions did not have a clear target audience (mixing parts for a lay audience and parts for experts)
- One submission originally produced for teaching purposes, adapted for MM

Only 4 submissions

⇒ Discussion on how to possibly increase the number of submissions for future editions:

- Some of the submissions did not have a clear target audience (mixing parts for a lay audience and parts for experts)
- One submission originally produced for teaching purposes, adapted for MM

⇒ Our proposal (for discussion and/or future MM committees):

◆ Two tracks:

(1) Educational

(2) Visualization for the community

Only 4 submissions

⇒ Discussion on how to possibly increase the number of submissions for future editions:

- Some of the submissions did not have a clear target audience (mixing parts for a lay audience and parts for experts)
- One submission originally produced for teaching purposes, adapted for MM

⇒ Our proposal (for discussion and/or future MM committees):

◆ Two tracks:

(1) Educational

(2) Visualization for the community

◆ Track 2 possibly less interesting, because of technical possibilities for talks

Only 4 submissions

⇒ Discussion on how to possibly increase the number of submissions for future editions:

- Some of the submissions did not have a clear target audience (mixing parts for a lay audience and parts for experts)
- One submission originally produced for teaching purposes, adapted for MM

⇒ Our proposal (for discussion and/or future MM committees):

◆ Two tracks:

(1) Educational

(2) Visualization for the community

◆ Track 2 possibly less interesting, because of technical possibilities for talks

◆ Videos in track 1 could become part of a CG youtube channel (for K12 students, but also as course material)
